

CERTIFICATE COURSE IN FUNDAMENTALS OF CRITICAL CARE MEDICINE

COURSE INTRODUCTION

This certificate course is designed for **healthcare professionals** who wish to enhance their knowledge and skills in **critical care medicine**. It focuses on building strong foundational skills that can be directly applied in the management of critically ill patients across diverse clinical scenarios.

Through this program, participants will learn the **latest evidence-based practices** for assessment, diagnosis, treatment, and monitoring of critically ill patients.

The course also emphasizes hands-on training in essential procedures and life-support skills, including: **Mechanical ventilation, Central venous and arterial line placement, ECG and ABG interpretation and Emergency and life support techniques.**

This certificate course is designed by **Easelife Healthcare** in collaboration with leading hospitals in Delhi and Mumbai.

- **Structure:**
 - **23 online lectures** delivered via a recognized digital platform
 - **5 hands-on training sessions** at affiliated hospital training centers.
- **Mode:** Blended learning – online + in-person sessions
- **Focus:** Practical, evidence-based, skill-oriented training

This course offers an ideal balance of **theory and practice**, ensuring participants gain the confidence and competence to manage critically ill patients effectively.

ABOUT EASE LIFE HEALTHCARE SOLUTIONS

Ease Life Healthcare was founded eight years ago in Delhi by a group of senior doctors experienced in intensive care focusing on professional training and delivery of healthcare.

Our Goal:

"Drive the Triple Aim: improving health outcomes, enhancing patient experiences, and reducing healthcare costs."

Our Activities:

- Academic courses for doctors and nurses
- Medical conferences and clinical workshops
- Home health care solutions

PHILOSOPHY & GOALS OF THE PROGRAMME

This program enhances the skills of healthcare providers, standardizing patient care and ensuring quality outcomes for critically ill patients.

Focus on the 5 C's:

- Compassion
- Competence
- Confidence
- Conscience
- Commitment

COURSE CURRICULUM

Theoretical Modules:

1. Assessment of critically ill patient
2. Shock assessment and management
3. Intravenous fluids and resuscitation
4. Oxygen therapy
5. Pharmacology of important drugs used in intensive care
6. Airway management
7. Non- invasive ventilation
8. Mechanical ventilation
9. Non-invasive monitoring
10. Arterial blood gas analysis
11. Interpretation of ECG
12. Chest x ray and CT scans
13. Cardiopulmonary resuscitation
14. Central and arterial line placement
15. Temporary cardiac pacing
16. Management of acute coronary syndrome
17. Acute management of ischemic stroke
18. Nutrition
19. Sepsis and septic shock
20. Major trauma
21. Antimicrobial stewardship
22. Renal replacement therapy

Hands-On Training:

- Mechanical Ventilation Techniques
- Airway Management
- ACLS
- Non-invasive Monitoring
- Line Insertions

There will be an objective based online exam and candidates who pass the exam will be provided a certificate of course completion. Candidates who do not pass can give exams again along with the next batch.

WHAT YOU WILL GAIN

- In-depth Critical Care Knowledge
- Enhanced Clinical Decision-Making
- Ethical Practice and Communication Skills
- Prestigious Certification
- Immediate Application of Practical Skills

SPECIAL FEATURES

- Engaging Lectures
- Case-Based Learning
- Flexible Study Schedules
- Reading material in digital format
- Networking with Industry Experts

OBJECTIVES

Graduates of the program will be able to:

- Deliver advanced critical care
- Handle medical/surgical emergencies
- Apply advanced technology in patient care
- Perform critical care procedures
- Enhance infection control practices
- Promote evidence-based practices
- Address patient and family psychological needs

CAREER OPPORTUNITIES

- Competitive Edge in the Healthcare Sector
- Hands-on Clinical Expertise
- Development of Soft Skills
- Flexible Learning Options
- Mentorship from Industry Experts

TEACHING FACULTY

The program is led by:

- Consultant Intensivists
- Physicians
- Specialist and Associate Consultants in various specialties
- Infection Control Nurses

CONCLUSION

This course equips healthcare professionals with vital skills to excel in high-pressure critical care environments.
